**Lake Belvadeere Access – grading/culvert improvements**

Alliant Energy, TIP-Rural Electric Cooperative, Iowa Telecom, and Wapello Rural Water Association are relocating their facilities at various locations.

200<sup>th</sup> Street (240<sup>th</sup> Avenue to 242<sup>nd</sup> Avenue) was closed to traffic on March 6, 2009 to begin work on a new concrete box culvert crossing. Park detours have been established and marked.

All other roads are open to traffic. However, temporary road closures may occur during the workday in order to move equipment, materials, etc. over the roadway. All landowners will have access to their property from at least one direction during construction activities.
